SOFAS & MORE

We are Hakola – a family company from a village called Jurva in South West Finland. Furniture making runs in our blood. In 1963 Eero Hakola sold his cows, converted his barn into a workshop and started making furniture. Today, our team of skilled local carpenters and the most talented young Finnish designers continue the work Eero started 50 years ago in his barn. Hakola's roots and history are in the production of upholstered furniture, but currently we are incorporating a variety of interior decoration products as a part of our expanding collection. We are committed to proudly advancing the tradition of high-quality carpentry and design tradition in Finland.

The launch of our new collection and concept 'Sofas & More' in the autumn of 2015 was very successful in the Finnish market. We are thrilled to now introduce you to our new designs at the Stockholm Furniture & Light Fair 9-13.2.2016.

SEE OUR NEW DESIGNS AND MEET THE DESIGNERS

ROUND table is simple in form and structure, yet a showpiece for any interior. The round table top functions as a blank canvas for funky everyday objects -or for wine glasses when gathering around with friends. Designed by Ines Vartiainen and Fanni Suvila.

LIPPA is a multifunctional shelving system designed to meet the challenges of storing everyday items elegantly and discreetly. Each Lippa shelf has a mechanism that enables opening and closing of the cover lid. When the storing space is not needed Lippa stays closed, functioning as a beautiful wall decoration. Designed by Marianne Huotari.

RIIPPU is a hanging shelving system with ceramic jars. The jars can be used for plant cultivation or for storing. The innovative structure is designed to serve the function flexibly, and to create new exciting possibilities for cultivation and storing. Riippu can be placed on a wall, by a window, or hanged freely in a room. Designed by Samuli Helavuo.

Hakola Oy is a family company established in 1993 in a village called Jurva in South West Finland. Furniture has, however, been manufactured by the family since 1963, when Eero Hakola first established his company EH-Kaluste Oy. Eero's son Jari established Hakola in 1993, that today has 8 employees as well as a big number of subcontractors in South West Finland. Today Jari's daughter, designer Annaleena Hämäläinen, is taking over the lead.

Upholstered furniture has until today played a major role in Hakola's production. Currently the company is incorporating a variety of interior decoration products as a part of their collection. In Finland, Hakola products are available to consumers in Anttila Kodin1 chain, as well as Hakola's own web-shop.
